Right Triangle GUI Pop-up:

A Java Swing window titled "Right Triangle" with a close button (X) in the top right corner. The window has a light gray background. It contains two input fields for "a" and "b", each followed by the unit "in". A "Calculate" button is positioned to the right of the "b" input field. Below the input fields, there is a label "Area:" followed by an output field and the unit "in^2".

Right Triangle

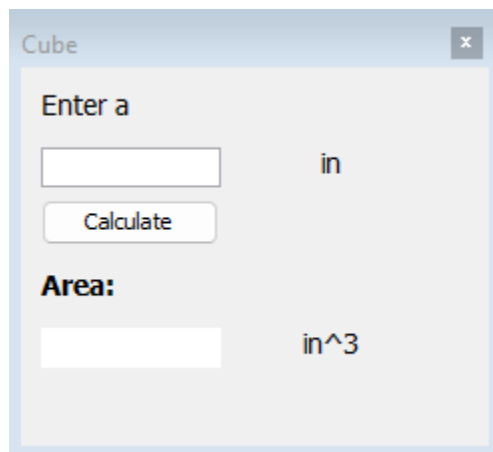

Enter a in

Enter b in

Calculate

Area: in²

Cube GUI Pop-up:

A Java Swing window titled "Cube" with a close button (X) in the top right corner. The window has a light gray background. It contains one input field for "a", followed by the unit "in". A "Calculate" button is positioned below the input field. Below the input field, there is a label "Area:" followed by an output field and the unit "in^3".

Cube

Enter a in

Calculate

Area: in³

Mini Project Phase 1

Euros to Dollars

11th Button Idea:

Currency calculator that allows the user to convert multiple types of currency (yen, euros, pesos, dollars, Canadian dollars, etc.). The user should be able to select the type of currency and what they would like to convert to using a drop-down box. The output will be calculated by pressing a button "Calculate" and the output will be displayed in a text field along with the symbol of the currency (\$ for dollars, ¥ for yen, etc.)
